## **DETAILED ACTION**

### ***Claim Objections***

1. Claims **1-9** are objected to because applicants have not used an acceptable transitional phrase such as "comprising" or "consisting of." In addition, applicants have not separated out the different steps involved in the method and have not listed each method step on a different line.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims **1-9** are rejected under 35 U.S.C. 102(b) as being anticipated by Redgrave et al. (5,756,067). Redgrave teaches a method of administering a marker substance that is identifiable in a bodily excretion to a test subject wherein a metabolizable substance is also mixed into the substance administered (abstract). The marker substance may be a benzoic acid derivative, a fatty acid derivative, a glycerol derivative, an amino acid derivative or a xanthine derivative (Examples 1-3).
